

Night fell, Insect Traps start attracting.....

EcoSolartec's physical pest control system

Environment friendly pest control for organic farming
 No chemical damage & side effect for eco-system
 Year round effective - economic pest control system.
 Adult insects trapping - prevent oviposition, reduce population

Attract photo-taxis insects by microwaves from UV and LED lamp
 DC power operating safe system - no any danger for electric shock & leaking, or fire.
 Automatic operating control.

Various application

Crop cultivating place, Animal breeding place
 Parks, Gardens, Golf courses, Public institution, School & etc.

MKSolar01 - Solar Mosquito Trap

SOLAR ENERGY SELF GENERATING, MOVEABLE INSECT TRAP, AUTO CHARGE AND ACTIVATES

Specifications

Solar panel	18V, 12.5W × 2EA (34cm x 24cm x 2 EA)
Auto control	DC 12V No danger of electric shock, and lightning
Battery	DC 12V Rechargeable Battery, Lithium Ion Battery(17600mAH)
Fan	1,200~1,500rpm low speed high-flow rate suction
Lamp	DC 12V 3~5W BL, BLB, LED Lamp
Weight	Approximately 16.5kg (Packaging)
Coverage Area	3305m ² in no blockage environment
Dimension	Body 545mm X 510mm X 390mm (Main Body)

Solar energy operating eco friendly insect trap.
 Easy install and move.
 Economic system, no need electric charge and cabling.
 DC power operating safe system, safety suction fan applied.
 Automatic optical control. Charge in day light & operate night time
 With one full charge on a bright day, it can be used up to 3 days (8 hours a day)

Innovation of pest control system, Solar pest controller.
Generated by solar energy, attract by lamp and capture.

Places where SOLAR TRAP can be used
