產品詳細

1 NEGATIVE ION GENERATOR

Produce large amounts of negative ions, physical adsorption, eliminate odors, has a strong adsorption. The negative ion will make the bacteria lost their activity, make them harmless, The biggest advance of negative ion is fresh our head.

2 PRE-FILTER

Use micron mesh filter, effectively block 2.5mm fibrous particulate matter, It can be cleaned easily by ten of thousands times, Preventing large particles such as pet fur, dander and coarse dust, etc. Can increase the life of the following filters.

3 HEPA FILTER

THE RATE OF REMOVING THE MINOR PARTICLES SMALL TO 0.3 MICRON FROM THE AIR FLOW CAN UP TO 99%. SPREAD OF ALLERGENS AND BACTERIA IN AIR FLOW, SUCH AS POLLEN, SMOG AND VIRUSES.

6 UV LIGHT

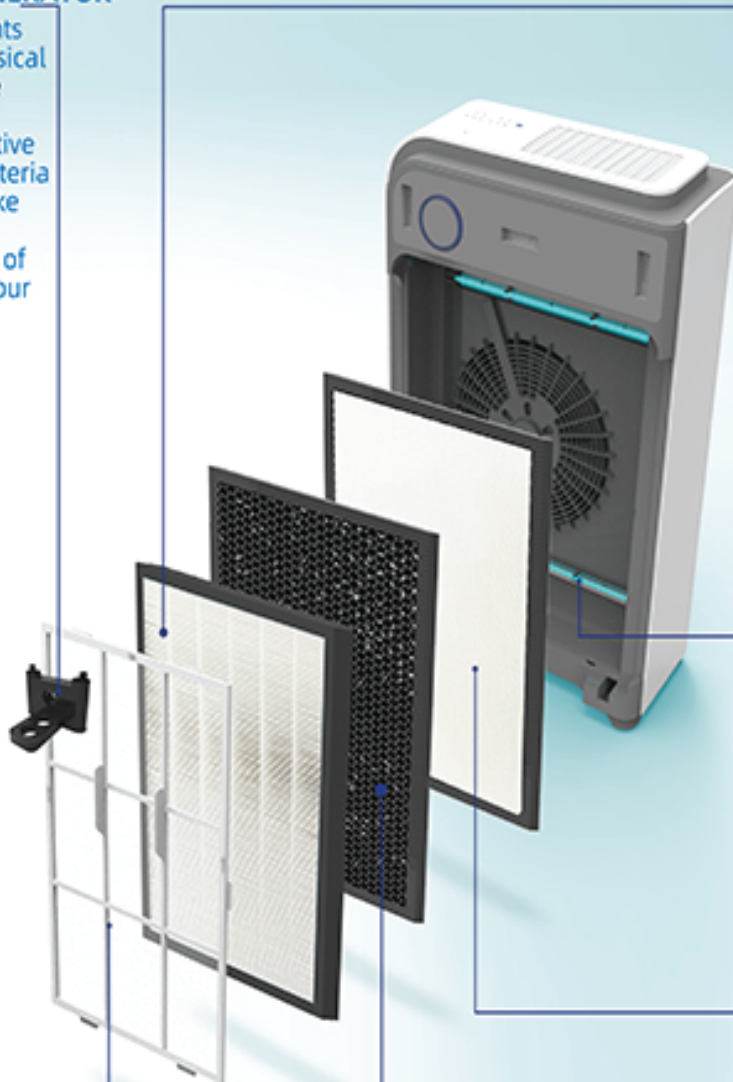

The use of a cold cathode ultraviolet lamp with a wavelength of 253.7nm can effectively kill a variety of common bacteria and viruses, and inhibit the reproduction and production of bacteria and viruses.

5 PHOTOCATALYST FILTER

Use Nano TiO₂ as representative materials has photo-catalytic function, under the role of UV light, it will have a strong catalytic degradation. Effective degraded of formaldehyde, toluene, xylene, TVOC and other pollutants.

4 ACTIVATED CARBON FILTER

Adsorption of volatile organic compounds, including unpleasant smells and kinds of polluting gases.
