

MK-Tank

UNPLUG OUTDOOR MOSQUITO TRAP

Eliminating Future Generator Of Mosquito

The MK-Tank takes advantage of the Zero-Hatch Technology to address the issue of eliminating mosquito populations at the root. MK-Tank focuses on eliminating future generation of mosquitoes by ensuring that the eggs laid by female mosquitoes do not survive to become the next generation of mosquitoes. The result is a significant reduction in mosquito populations in both public and private spaces.

Includes:

- 1 x Automatic MK-Tank
- 1 x Rain Guard
- 1 x User Manual
- A set of Refill Kit (2 x Landing Strips / 1 x Reactor)

How It Works

The mosquito attractant entices female mosquitoes into the Breeding Pond, where they lay their eggs, either on the Landing Strips, or in the water in the Breeding Pond. The eggs hatch into larvae (wigglers). Long before these wigglers moult into the pupal stage (prior to adult emergence) they, together with any eggs in the Breeding Pond, are automatically eliminated.

The internal pump drains the Breeding Pond through a filter every 72-hours. The eggs and larvae are filtered out and die in the filter. MK Tank then recycles the water, which in addition to the attractant from the Reactor, will now also contain naturally occurring mosquito pheromones and scents, further increasing the attractiveness of the Breeding Pond. After 40 days of use, there is a noticeable reduction in the mosquito population.

Consumables For Setup And Maintenance

8 AA Batteries (last around 4 months)

7L Water

Refill Kit (buy separately)

Maintenance

MK-Tank requires maintenance every 30 days to ensure a continued high level of effectiveness and smooth operation. The Reactor, Landing Strips (buy separately) and water need to be replaced every month. The batteries are expected to last between 4 – 6 months before a change is required.

TROPICAL CLIMATE RAIN PROTECTION

Rain protection allows for all weather performance

REPLICATES IDEAL SPAWNING BED

Irresistible to mosquitoes

Specifications:

Dimensions: 34 x 34 x 35 cm

Weight: 2.8kg

ENVIRONMENTALLY FRIENDLY

No chemicals, pesticides or harmful effects

LONG LASTING MINIMAL MAINTENANCE

Quick change reactor and batteries for easy, tool free servicing

Refill Kit

BOOST PERFORMANCE OF YOUR MK Tank

Universally Effective

The Refill Kit is used for automatic preventer. Select a lure type and the Refill Kit will target the breeds of mosquitoes that are in your area.

*MK-Tank is bought separately

Prevent Mosquitoes

The mosquito lure attracts mosquitoes into artificial pond where the provided landing strip act as an ideal spot for the mosquitoes to lay their eggs. Upon flushing the preventer, the reservoir will travel through a filter which separates the eggs from the water, killing future mosquito generations.

TROPICAL CLIMATE RAIN PROTECTION

Rain protection allows for all weather performance

REPLICATES IDEAL SPAWNING BED

Irresistible to mosquitoes

ENVIRONMENTALLY FRIENDLY
